

Job Description

Senior Software Developer

JOB OVERVIEW

Department:	Technical
Job Title:	Front end developer
Primary Purpose of the Job:	Development of UI/UX
Responsible to:	Head of development
Salary:	Negotiable depending on experience

DESCRIPTION

AppCheck Ltd develops Information Security software for its clients. The service we provide is designed to discover vulnerabilities in Web Applications and their hosting infrastructure.

The Software has been designed and delivered through a collaboration of Penetration Testing Consultants and Software Engineers.

AppCheck Ltd has a vacancy for a frontend developer who is motivated to combine the art of design with the art of programming and creating software of the highest standard. If you are looking for the opportunity to work with like-minded people with the support of highly skilled technical staff, then AppCheck Ltd would love to hear from you.

Person Requirements

It is essential that you are a bright, committed and willing individual that wishes to learn new technologies in order to become involved in a range of highly technical and challenging projects.

We are able to consider a range of experience, but your main responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application and design of new visual elements and components. This will be on both existing products and new products, it is desirable to have some design experience and experience in using photoshop.

Even though it's not a must have, we are interested in candidates who have a keen interest in Information Security. Applications from candidates that can demonstrate a passion for InfoSec will be well received.

KEY TASKS

- Develop new user-facing features
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Assure that all user input is validated before submitting to back-end
- Collaborate with other team members and stakeholders

Skills and Experience

To be considered for this position, meeting the following requirements is essential:

- Proficient understanding of web markup, including HTML5, CSS3
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Proficient understanding of client-side scripting and JavaScript frameworks
- Good understanding of ReactJS is desirable
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as Gimp or Photoshop is desirable.
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Proficient understanding of code versioning tools, such as Git / SVN
- A good understanding of SVG and SVG manipulation is desirable.

Applications for the role should be sent to info@appcheck-ng.com. To apply we would appreciate both a CV and covering letter explaining why this role is of particular interest / suited to you personally.
