

APPCHECK BENEFITS

OVERCOME YOUR SECURITY HURDLES

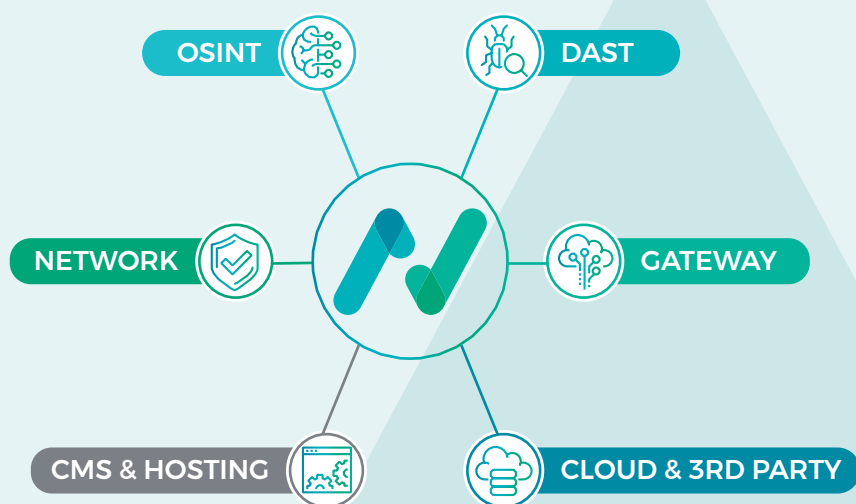

No limits, no boundaries. Our first-principles approach to vulnerability detection works across all platforms and frameworks. Scan APIs, SPAs, infrastructure, and modern web apps effortlessly.

- ✓ Thoroughly scan and test your APIs including Swagger (Open API), GraphQL and SOAP endpoints for security flaws
- ✓ Create scripted routes that model user journeys and complete multistep flows through complex web applications to crawl a much larger application footprint
- ✓ Dynamic fuzzing technology allows visibility of the true and deeper attack surface

COMPREHENSIVE ASSET COVERAGE

AppCheck is designed to cover and test each layer of an organisation's key IT systems for vulnerabilities, in one seamless and intuitive solution, providing up to the minute coverage of your whole estate.

- ✓ Powerful DAST testing coupled with hourly updates from our VulnFeed service enables you to protect your Internal and External assets from zero-days and 100,000+ known security flaws
- ✓ The AppCheck scanner not only detects DAST and VulnFeed issues but also actively identifies other vulnerabilities and security misconfigurations that could be exploited by hackers to compromise your systems and data

APPCHECK BENEFITS

UNCOVER VULNERABILITIES OTHER TOOLS MISS

Beyond using a database of static signatures of known vulnerabilities, the AppCheck platform applies rigorous testing methodologies by sending payloads to tease out previously unknown weaknesses mirroring methods utilised by penetration testers.

- ✓ Detect hidden issues which can only be identified through advanced out-of-band detection techniques
- ✓ Automated detection of vulnerabilities often thought to require manual penetration testing, such as Insecure Direct Object Reference (IDOR)
- ✓ Open-Source Intelligence (OSINT) gathers information that can be seeded into the assessment process

The screenshot displays the 'Vulnerabilities' section of the AppCheck platform. It features a table with columns for 'CVSS 2', 'CVSS 3', 'Name', 'Assignee', 'Host', 'Target', and 'Parameter'. Below the table, findings are grouped by severity:

- High (771)**
 - Out-of-band XXS Triggered
 - XXE Vulnerability detected
 - Insecure Direct Object Reference (IDOR)
 - Poisoned Password Reset Link via X-HTTP-Host_Override header
- Medium (1,438)**
 - Possible Data Disclosure via 'orders' GraphQL Query
 - TLS Server Name Indication Server Side Request Forgery (SNI S...)
 - HTTP/2 Out-of-Band Service Interaction (HTTP)
- Low (3,719)**
 - Azure Storage Container: Indexing permitted & Interesting Files Found
 - Application hostname not restricted
 - GDPR: Sign-up or contact form includes 'opt-in' check box that...

SCALABLE SOLUTIONS FOR ALL SIZES

AppCheck adapts to growing teams, expanding estates, new technologies and business challenges. Whether you are scanning 1 or 1,000 applications or hosts, discover and manage the latest security flaws like a team ten times the size.

- ✓ Each licence offers unlimited scans and unlimited users so you can share findings across all teams and scale as you grow
- ✓ Save hundreds of hours of precious resource and focus on those projects you've been meaning to get around to
- ✓ Link with your existing development tools or use our open API for complex builds as you grow

MORE EFFICIENT APPLICATION SECURITY

Add automation to your application security processes to enable your security team to focus on what matters.

- ✓ Detailed reports listing the potential impact, a technical narrative detailing how the flaw was detected and detailed remediation advice
- ✓ Deliver automated vulnerability testing through your build servers such as MS Azure DevOps, Jenkins and Team City
- ✓ Safe exploitation of vulnerabilities to demonstrate impact and reduce false positives

ADAPTABLE REPORTING & MONITORING

Quickly identify areas that need improving as well as where you're winning. All the information you need to stay on top of your security posture.

- ✓ Group scans into one report for visibility of individual users or entire departments
- ✓ Assign and prioritise vulnerability remediation to nominated members of your team
- ✓ Whether you just want to run a quick scan or are a power user who needs ultimate control, AppCheck allows complete flexibility

APPCHECK BENEFITS

YOU'RE COVERED WITH SUPPORT

SLAs are our priority. With a current G2 rating of 9.8 out of 10 and a Customer Satisfaction rating of 98%, AppCheck's UK-based Support are on hand for any queries or guidance customers may have when using AppCheck. As well as quality support, our customers can expect:

- ✓ Constantly updated AppCheck online support platform and FAQ's
- ✓ Dedicated Client Services Executive with quarterly account reviews
- ✓ Scan configuration guidance and configuration assistance

A FREE TRIAL SCAN TO PROVE RESULTS

Free scan for your most critical assets to showcase our results.

- ✓ Pre-sales support to help you configure the trial scan
- ✓ Complete scan with all plug-ins
- ✓ Full report for you to keep
- ✓ Access to technical support for remediation guidance
